- ANY SIZE DIVIDER BLOCK SECTION

SPECIFICATIONS

Material.....Stainless Steel
 ApplicationMonitors Fluid(Oil)or Grease Systems
 Rated Pressure.....6500 PSI
 Indication.....Highly Visible Snap-Action Bright Orange

DESCRIPTION

The DELIRON CYCLE INDICATOR is a cost-effective and easy to install lubrication monitoring device. It has a custom machined stainless steel housing and powerful internal magnet assembly built for industrial use. It is totally sealed and can accurately monitor fluid or grease systems. It can be installed on any section and either side of a divider block. The highly visible indicator has a snap-action movement which makes it easy for the user to see as well as determine the precise timing of each divider valve cycle.
